Why Choose
The MechLab Engineering

- **Design for manufacture**
  Parts that are practical and economical to make.
- **Clear documentation**
  Well-organised models and drawings.
- **Fast turnaround**
  Open communication at every step.
- **Flexible support**
  From one-off parts to full assemblies.
- **Confidential**
  Your designs are handled with care.

CAD 3D modelling	**2D** Drafting & GD&T	**3D** Printing
SHEET Sheetmetal design	**FAB** Fabrication support	**NPD** Product development

Let's build together.

THE MECHLAB ENGINEERING

Mechanical Design • Sheetmetal • Fabrication • 3D Printing

DESIGN • ENGINEER • DELIVER

Thank you for considering us for your next project.

COMPANY BROCHURE

Design | Development | Fabrication | 3D Printing

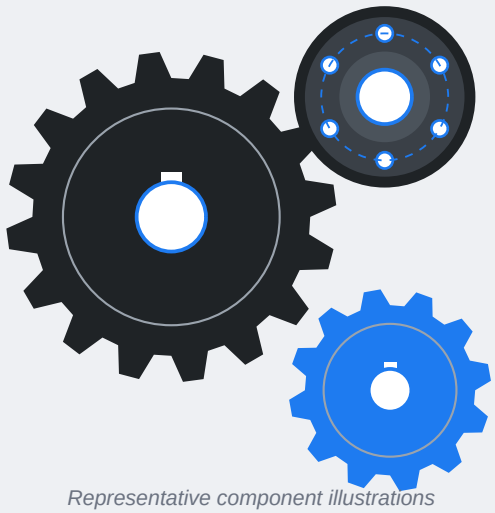

DESIGN • ENGINEER • DELIVER

Engineering ideas, built to perform.

About Us

The MechLab Engineering is a mechanical engineering design studio that turns ideas into manufacturable products. We combine practical design experience with modern CAD and 3D printing tools to deliver parts and assemblies that are strong, efficient and cost-effective to produce. From product development and sheetmetal design to fabrication support, we cover the path from idea to finished part.

Whether you need a single bracket, a complete mechanism or a full drawing package, we work closely with you from the first sketch to the final deliverable.

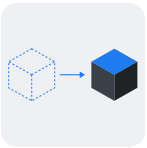

Representative component illustrations

Our Services

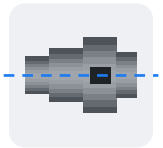

Mechanical Design

Mechanisms, machine parts, fixtures and jigs.

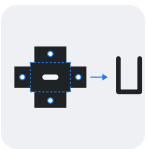

Product Development

From concept to a production-ready product.

3D CAD Modelling

Parametric part and assembly models.

Sheetmetal Designing

Enclosures, brackets and flat patterns.

2D Drafting & GD&T

Production drawings with tolerances.

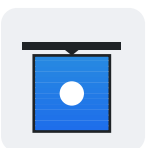

Reverse Engineering

Models from existing physical parts.

Fabrication Support

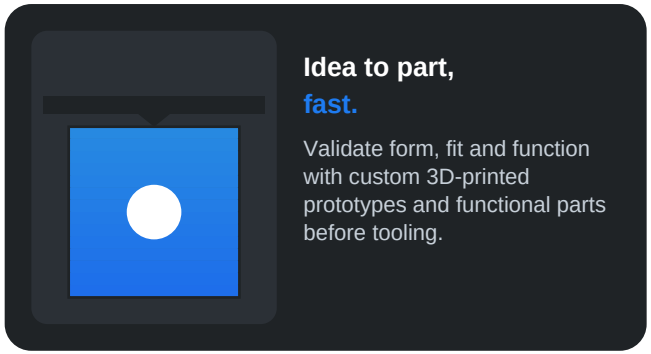

Drawings and guidance for fabrication.

3D Printing

Prototypes and functional parts in PLA, PETG, ABS.

3D Printing

How We Work

1. **Requirement**
   Share your idea, sketch or part.
2. **Concept**
   Options, materials and methods.
3. **Modelling**
   CAD and interference checks.
4. **Drawings**
   Files ready for fabrication.
5. **Print & Support**
   Prototypes, revisions, production.
